In today's world, well-developed social-emotional learning skills are essential. Unfortunately, most programs omit these vital objectives. **Values and Decisions**, an online course rooted in the Core CASEL Competencies (2017) provides schools with a flexible curriculum focused on developing emotional intelligence. Through engaging lessons, students are asked to reflect, write, and respond to videos and readings while evaluating their own social-emotional growth.

**Values and Decisions features:**

- Flexible lesson design to accommodate independent study/blended learning or direct teaching models.
- A year-long course with pre-and post-assessment surveys for progress monitoring.
- Technical assistance at each stage of implementation.

**Values and Decisions - Curriculum To Build Necessary 21st Century Skills**
